RETIREBLUEPRINT PRO

YOUR RETIREMENT. YOUR PLAN. YOUR FREEDOM.

Welcome — your plan starts now

A lifetime retirement plan, built just for you.

Hi there,

I'm so glad you're here. I built RetireBlueprint Pro because I wanted exactly what you probably want — to see my whole retirement picture clearly, in one place, and to stop quietly wondering whether things were going to be okay.

I couldn't find a tool that did it the way I needed, so I built one myself — and kept refining it until it gave me real peace of mind. Now it's yours, and my hope is that it gives you that same clarity and calm.

WHAT'S INSIDE YOUR PLAN

- **Lifetime Projection** — your full financial picture, year by year, for life
- **Safe-Spend Solver** — exactly how much you can spend each year with confidence
- **Roth Conversion Optimizer** — your ideal window to minimize lifetime taxes
- **Social Security Optimizer** — the real impact of claiming early vs. late
- **Bear-Market Stress Test** — see your plan survive even a 2008-style crash
- **Your Data, Your Sheet** — your data lives in your own Google Sheet, not a company database

YOUR 5-MINUTE SETUP — THREE QUICK STEPS

1. Make your own private copy of the planning sheet.
2. Share it so the app can run your plan — this gives RetireBlueprint Pro access to your sheet. We only open it ourselves if you ask for help.
3. Paste one link to connect, and you're in.

▶ **Start My Setup**

All on one guided page · nothing technical to figure out on your own

Have these handy for your Inputs page: your Social Security estimate (free at ssa.gov/myaccount), recent account balances, and your monthly expenses. You don't need it all at once — save as you go and come back anytime.

Warmly,

Gena B. Philpott
